

USPS Market Dominant Product Customer Experience Measurement (CEM) Survey Instruments And Results

I. PREFACE

A. Purpose and Content

USPS-FY13-38 consists of four documents. The first three are survey instruments that have been used by the Postal Service to develop measures of customer experience for fiscal year 2013: (a) the Residential Customer Survey, which was used to survey Residential postal customers; (b) the Large Business Customer Questionnaire, which was used to survey Large Commercial business customers; and (c) the Small/Medium Business Customer Survey, which was used to survey small and medium size businesses. The fourth document consists of summary customer experience measurement survey data generated by use of the three survey instruments.

B. Predecessor Document

USPS-FY12-38 was previously filed with Commission in connection with the Annual Compliance Report for FY 2012.

C. Methodology

Randomly selected Residential customers have been mailed surveys and given the option of returning them by mail or completing them online. Small and Medium-sized business customers (those with fewer than 250 employees at one site) were also randomly selected to be mailed surveys and can choose to respond by mail or online. Large business survey customers with 250 or more employees at one location are mailed an invitation and asked to complete an online survey.

Survey Type	Number of Surveys Initiated	Number of Surveys Received*
Residential	2,215,626	301,654
Small/Medium Business	4,074,717	299,792
Large	50,499	3,434

* This is the number of surveys which were sufficiently complete to be analyzed and have their results reported.
